Integra® MicroFrance®
Casiano Transcervical Laryngeal Injection Medialization Needle

Developed in conjunction with Roy R. Casiano, MD

The Casiano Needle was designed for the transcervical approach to vocal fold medialization. Its trocar design aids in penetrating the thyroid cartilage.

The blunt tip, 21.0 gauge needle, and handle help facilitate atraumatic palpation that may help airway penetration.
The MicroFrance® brand is a premier line of ENT instruments, designed with world-renowned ENT surgeons to facilitate new techniques and improve patient outcomes.

Availability of these products might vary from a given country or region to another, as a result of specific local regulatory approval or clearance requirements for sale in such country or region.

- Non contractual document. The manufacturer reserves the right, without prior notice, to modify the products in order to improve their quality.
- Warning: Applicable laws restrict these products to sale by or on the order of a physician.
- Consult product labels and inserts for any indication, contraindications, hazards, warnings, precautions, and instructions for use.
